P.T.I

Push & Twist Inserter

A new, easy and simple tool for inserting start connectors

into polyethylene irrigation piping

NEW

Pat.Pend.

Advantages:

1. One tool that incorporates 2 actions - punching and inserting
2. Comfort-no need to bend down to the pipe.
3. No need for hand-drill and an additional inserter tool.
4. Time saving-hundreds of punches in short space of time.
5. One tool suits a large variety of start connectors and plungers.

Operation:

1. Place the start connector on the blade downwards.
2. Push the blade until penetrating the pipe.
3. Twist the handle to create a round hole in the pipe.
4. Insert the start connector

Suitable for polyethylene pipes from 40mm and up.
Suitable for Plastro start connectors (suits other start connectors also)
Suitable for plungers to "sprinkler stand" (using adaptor)
